

ABRA Update #113 – January 20, 2017

Your Help Is Needed: Support the Forest Service

The Federal Energy Regulatory Commission (FERC) released last Fall a new schedule for its consideration of the Atlantic Coast Pipeline (ACP). FERC asked the National Forest Service (USFS) to comment on the schedule. Final approval of the project by FERC requires the issuance of a special use permit by the NFS regarding the pipeline's proposed path through the Monongahela National Forest and the George Washington National Forest (GWNF).

On December 13, the Forest Service wrote FERC strongly objecting to the proposed timetable. The USFS letter stated that "the Forest Service does not concur with the permitting timetable and requests that the permitting timetable be revised to state that the final completion date of the Forest Service's consideration of the special use permit application is "To Be Determined." The letter points out that FERC's timetable fails to consider procedures required by federal law, therefore making the proposed deadlines for NFS action incorrect and at odds with applicable law. Also at issue are amendments to the existing Land and Resource Management Plan (Forest Plan) that is being sought for the ACP. The Forest Plan for the GWNF was adopted in 2014 after a multi-year effort involving input from thousands of citizens.

Please write within the next week to key USFS officials and urge them to:

- 1) Conduct a complete and thorough review of the pending application for a special use permit for the ACP, as required by law;
- 2) Do not amend the existing Forest Plan for the George Washington National Forest.

For more information refer to the [special ABRA alert](#), which includes additional background and the addresses for whom to write, and the [December 13 USFS letter to FERC](#).

Thank you for your help!

It's Not Too Late to Voice Your Concerns to VOF

The Virginia Outdoors Foundation (VOF) is scheduled to consider on February 9 the application by Dominion Transmission, Inc. to receive approval for the Atlantic Coast Pipeline to cross 11 conservation easements in Highland, Bath, Augusta and Nelson Counties held by the VOF. State law provides for exceptions to conservation easements, but only if certain criteria are met. ABRA does not believe the Dominion proposal satisfies the requirements of the law. Additional information is available [here](#) and see *Recorder* article below.

ABRA Needs Your Support

*The challenges facing the Allegheny-Blue Ridge Alliance in 2017 are daunting.
With your financial support we can continue to fight effectively
against unneeded pipelines through our region*

Please support ABRA's important work by clicking [here](#).

Please write the VOF before February 9 and urge the organization to:

- support the clean water, wildlife habitat, working farmland, rural character, and scenic views protected by the conservation easements,
- preserve the essential trust that exists between landowners and VOF, critical to the future of land conservation in Virginia, and
- deny Dominion's unprecedented and irresponsible request to permanently impair conservation values on 10 conserved properties.

Send your letters or emails to:

N.C. Walk to Protect Our Peoples and the Places We Live: March 4-19, 2017

The North Carolina Alliance to Protect Our Peoples and the Places We Live (APPPL) is organizing a Walk along the 205-mile Atlantic Coast Pipeline route in NC, beginning on Saturday March 4 at the Virginia-North Carolina border in Northhampton County, and ending two weeks later in Pembroke and then in Hamlet.

The Walk will pass through several cities as well as through farmland and small communities. We are organizing as many educational activities as possible in schools, churches, community centers, city planning and public official's offices.

There are various ways people can participate in and contribute to the Walk. For more information, for weekly updates, to register, and to donate to the Walk, please see our full [announcement](#).
